

WHAT?

- what does this SP Coordination system look like?
- what are the Coordination issues burning for attention?
- what level needs most attention?
- what is missing?
- what does the problem look like from the inside?
- what effect does this SP Coordination system have on the beneficiaries?

WHY?

- why was the SP Coordination system built like this?
- why does what this SP Coordination element exist?
- why is this a challenge in SP Coordination?
- why have previous efforts to solve not worked?
- why do we have less effective SP Coordination than we wish at policy-programme/institutional/admin levels?

WHERE?

- where is the most likely place for problems?
- where is the best place to look for solutions?
- where is the best place to start change?
- where can we integrate more and at what level?
- where are the incentives for SP Coordination?
- where is the best capacity?
- where is the least capacity?

WHEN?

- when did this problem first get noticed?
- when should this proposed analysis take place?
- when should this proposed change happen?
- when must analysis/ structure/ people/ technology/ stream-lining/money be supplied?
- when do we decide to work on horizontal vs vertical coordination?

WHO?

- who is responsible for these issues?
- who is the best to make this change?
- who has information critical to answering the problems we're outlining?
- who has tools for improving SP Coordination?
- who is best to motivate for this?

HOW?

- how did this SP Coordination system get like this?
- how can we improve horizontal coordination?
- how can we improve vertical coordination?
- how will we know this is working?
- how can we best sustain change once it begins?
