# 13

There is only one key approach to use when developing an Integrated System for Information Management and that's the Social Registry

## MYTH OR TRUTH?

# 14

Regardless of the selected approach to integration (social registry, virtual registry or integrated beneficiary registry), a government will be able to have an overview of who receives what in terms of grant

## MYTH OR TRUTH?

**15**

Integration is
mainly a policy issue
requiring political
and institutional
arrangements rather
than technical 'fixes'

*MYTH OR TRUTH?*

**16**

Integration
across the Social
Protection Sector
increases risks to data
privacy and security

*MYTH OR TRUTH?*

# 17

If a country does not have 100% of population with national ID they will not be able to integrate data and information management for social protection as there will be no unique identifier for data-matching.

## *MYTH OR TRUTH?*

**18**

In an integrated
system, all linkages
between databases are
bi-directional

*MYTH OR TRUTH?*

## 19

An MIS is the backbone of the effective implementation of Social Protection Programs

*MYTH OR TRUTH?*

# 20

What matters
most when creating
an integrated system
for information
management is the
level of connectivity,
interoperability and
linkages between
different systems;
NOT the creation of a
super sized registry

## *MYTH OR TRUTH?*

# 21

The aim of developing an integrated system for Information Management should be to ensure a more equitable, responsive and efficient delivery of service

## *MYTH OR TRUTH?*

**22**

'It's not possible to integrate your program MISs if they are paper based'

**MYTH OR TRUTH?**
