

SCENARIO 2A

Alternative M&E Approaches

You are implementing a social cash transfer scheme in a geographically remote and poor area of the country.

However you hear some negative and demoralising comments from the community members and you start having doubts as to whether your intervention is making a difference in the community.

You have a strong M&E system that generates information each month. The transfer payments are made on time and in full. An evaluation is not due for three years.

INSTRUCTIONS

- a) What alternative Monitoring and Evaluation approaches do you need to address this situation?
- b) What data sources can you use?
